Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 5-8 and 13-14 recite, "adapted to." It has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability in any patentable sense. *In re Hutchison*, 69 USPQ 138.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 and 8-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Glick (4,063,110).

Glick teaches an electrical box comprising:

a bottom (see figs. 1 and 2);

a plurality of adjacent walls;

a top hingedly joined to a top edge of one wall;

Art Unit: 2832

at least one conductor opening 25 (slot for claim 9) adjacent to the top edge for receiving at least one conductor; and

the opening being at least partially defined by the top when the top is closed.

Regarding claims 2 and 3, the top is unitary with a top edge of the sidewall (see fig. 1) by a hinge, the hinge being a living hinge.

Regarding claims 4 and 10, the molded case (col. 2, line 32) includes frangible portion.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 5-7 and 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glick in view of Ericksen (5,245,507).

Glick teaches the claimed invention except for the opening and the open box perimeter "adapted to" engage as seal.

Ericksen teaches providing a seal 34 (fig. 3) for an opening to an electrical box. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the opening of Glick's box with the pliable seal as taught by Ericksen. Since the pliable seal of Ericksen would provide the box of Glick with weather resistance (see abstract of Ericksen).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please see the attached PTO-892.
